

Cleaning - Silhouette® Shades

Regular dusting with a feather duster or a vacuum cleaner at the LOWEST setting will usually be enough to keep the Silhouette® Shades clean. Ingrained dirt and most stains can be removed by immersing the shade in a bath of water with a mild (non-synthetic) soap powder. Caution: do not get the headrail wet! Rinse thoroughly with clean water and leave to dry in the fully lowered position with the vanes closed.

Do not iron the Silhouette® Shades!

The Silhouette® Shades can also be cleaned by professional cleaners (using ultrasound), with the exception of the 'Bon Soir' fabric. Contact your supplier about cleaning this fabric.

These recommendations have been compiled with great care. Nevertheless we can accept no responsibility for the results of cleaning.
