## XL for large windows

With XL, Luxaflex® responds to the larger windows that are being applied more and more frequently in modern architecture. Greater widths are spanned effortlessly, and thanks to sophisticated systems, these blinds are easy to operate and to install.

## Duo Blinds: two-in-one

Duo Blinds: two Luxaflex® blinds in one cassette. The blind closest to the window is always a Roller Blind. For the near side there is a choice: Luxaflex® 20 mm Plissé Shades, 25 mm Duette® Shades or 32 mm Fixé or alternatively, choose another Roller Blind to play with light control.

## Nano Roller Blind: compact form and installation directly onto the window

The new Nano Roller Blind is adhered directly onto the glass of a door or window: without drilling or any screws required! Installation with mounting clips is also an option. The cassette box is extremely compact and can be easily positioned to fit behind door and window handles. A Top Down/Bottom Up double cassette option is also available. This option can also be used for added privacy whilst still allowing daylight to enter the room (see separate brochure).

## Decorative Finishing Options

Give your creativity free reign with the new selection of decorative Finishing Options, including rings, decorative pulls, bottom rails and decorative buttons for poles. Have you ever considered a scalloped edge with a trim in a contrasting colour? Or perhaps magical, glittering CRYSTALLIZED™ - *Swarovski Elements* to decorate your blind?

## Durable and safe fabrics

Many Luxaflex® Roller Blind fabrics have undergone special treatments to make them dirt and moisture resistant and/or to ensure that they reflect heat and light. In nearly every colour group of the fabric collection, Luxaflex® offers a wide choice of fire-retardant Trevira® CS fabrics. With the new Roller Blinds collection, safety and good looks go hand in hand!

GreenScreen EarthCare is an 'eco' fabric for Roller Blinds, produced from lactic acid as it occurs in sugar cane and corn starch, using revolutionary and sustainable technology. This organic fabric is 100 percent biodegradable and is available in both black and white.

## Skylight Roller Blinds, both functional and elegant

This extensive collection can also be applied to skylight roof windows, regardless of type or make. A large number of dim out fabrics make room darkening possible.

## Oriental atmosphere

Roller Blinds from the Japanese Design Collection are made from a special fabric called 'washi'. This Japanese rice paper filters the light subtly and provides warm, natural radiance. Ask your dealer for the special collection book for further information.

## From flowers to children's drawings in an infinite number of colours

Luxaflex® Expressions Roller Blinds have attractive designs including romantic flowers, modern designs and cheerful children's illustrations. Choose a matching structure print in one of the three different transparencies. Ask your dealer for the special collection for further information.

Choose Luxaflex® Window Styling for a unique quality product with a five-year guarantee.
